DESCRIPTION

The Princess V78 has proven to be a very successful and high performing model at launch, she has an excellent appearance and a foolproof hull with exceptional seakeeping.

Powerful and contemporary, she has been designed and built to deliver extreme excitement. The Princess V78 hull uses the latest resin infusion technology to reduce weight and improve performance. The result is a yacht of remarkable performance and certainly one of the most representative of her class.

The cockpit is spacious with multiple seats and a large sun deck under which is a large enclosed shelter that can accommodate a 4m tender.

The hydraulic bathing platform can also accommodate a jet ski if required. Sliding glass doors and electric windows make the cockpit and main deck saloon a perfect place for entertaining.

The Princess V78's saloon is furnished with contemporary furniture to comfortably accommodate eight guests. The lower deck is divided into four en-suite cabins, including the owner's cabin on the main beam.
